**Emergency containers
in standard sizes**

PAUL MÜLLER

macht's transportabel

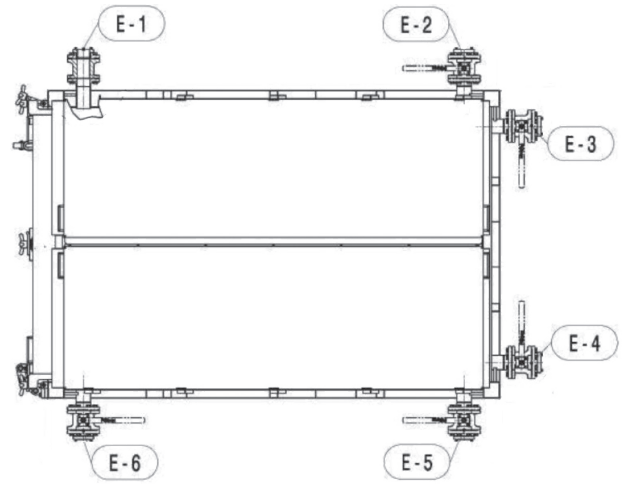

Your lithium battery is burning? We have the safe solution!

Our emergency containers offer safety and protection of the environment in case of damaged batteries. The container makes it possible to control the reaction of a defective battery.

The easy-to-open front flap allows fast loading of the container in the event of an emergency. Continued water supply provides the necessary cooling. If desired, a drainage outlet can be provided for controlled disposal of contaminated water.

For fast and easy handling, we offer you our emergency containers in four standard sizes.

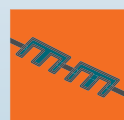

You need an emergency container with different dimensions? No problem! Here too, we are your reliable partner who will produce your special customised solution. Please do not hesitate to contact us.

Possible emptying positions (E1-E6)

	Emergency container versions							
	Size 1 / PM-1245		Size 2 / PM-1436		Size 3 / PM-1062		Size 4 / PM-1423	
	Version A	Version B	Version A	Version B	Version A	Version B	Version A	Version B
